

# Individual reflection, Daniel Danielsson, week 4

## **What do I want to learn or understand better?**

This weeks goals and task were set pretty low from my part. My daughter had surgery on her tonsils and I informed my project members about this.

## **How can I help someone else, or the entire team, to learn something new?**

During the meeting we discussed the issue that the code we wrote in the client package had to be translated to javascript. This cause a lot of issues since there were only a few gwt packages that we could use (that is translatable). Previous week we found out that we were able to use any package as long as we wrote the code in the server package of gwt. This was brought up on the meeting to make sure everyone was informed.

## **What is my contribution towards the team's use of Scrum?**

I took part in the meeting on Monday and went through the tasks along with the team.

## **What is my contribution towards the team's deliveries?**

Nothing this week.
